WHAT IS GIFTLED PROJECT?

The idea for the GIFTLED project is to provide gifted individuals learning opportunities to increase their motivation and avoid the feelings of frustration and stagnation by offering them a pathway to realise their potential in STEAM.

GIFTLED

WHY IS THE PROJECT RELEVANT TODAY?

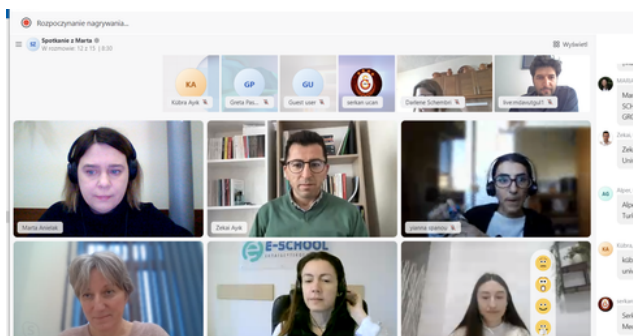

The 'design by learning' approach can provide gifted students with the opportunity to engage in educational activities in which they can transform their subject knowledge into creative educational products. Moreover, learning about the 'design by learning' approach and the toolkit for creating digital and virtual applications enables teachers to develop pedagogical competences for teaching activities where students learn and design their knowledge through digital and augmented reality applications.

EXPECTED RESULTS OF THE PROJECT

- Training Resources for Talented Individuals including a Handbook for teachers, Augmented Reality Cases Package for gifted/talented individuals, a Toolkit Introduction Videos package for teachers and gifted/talented individuals, Remote Brunch series and a GiftLed Curriculum for trainers.
- An Open Digital Platform To Promote Gifted STEAM Learning including the platform itself as well as practical Staff training course on it.

KICK OFF MEETING

On January 18 2023 partners had a kick off meeting to start the project. At the meeting the consortium discussed the project's curriculum, timeline, planned results, social media branding and many more significant topics for the project.

Inspired partners are already starting the implementation of the project, so stay tuned for the next newsletter!
