What is GIFTLED?

The GIFTLED project aims to develop resources such as flyers and videos in order to integrate the gifted into STEAM education. These resources will be of use to both educators and learners, as the specific educational needs and talent development are taken into account. Different STEAM topics are covered in GIFTLED material, in order for the gifted learners to explore different fields. AR technologies are used to create interactive material. Through this project, gifted students will have new resources to use in their educational journey.

Project Partners

The project consortium consists of different organisations coming from seven European countries. Various meetings were held online in order to achieve the planned results. The first face-to-face meeting of the consortium took place in Istanbul, Turkey, on 16-17 November 2023. The partners discussed the way forward for the project.

RESULTS

The planned results of the project include different media which aim to train and support teachers of gifted pupils. The planned project results include:

1. A digital Handbook,
2. Augmented Reality Cases
3. Videos about Digital Design Tools
4. A Curriculum.
5. An open digital platform
